EN 13634:2017

#ProtectYourFeet

THE WORLD'S BEST IMPACT PROTECTION.

D3O® protective internal malleolus inserts on both sides, an innovative material that provides good protection and comfort.

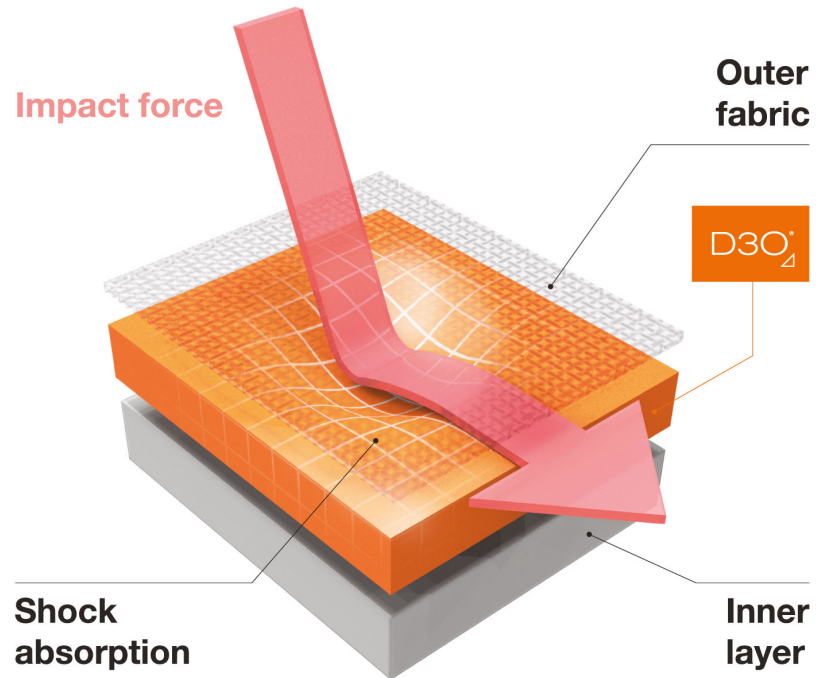

Nothing protects better than D3O®.

A new technology that offers the thinnest and most advanced impact protection.

D3O® molecules move freely and allow the material to remain soft and flexible. On impact, the D3O® molecules, thanks to their characteristics, absorb and disperse energy.

The D3O® Fitted Ankle Guard meets CE standard EN 13634 under 5kn transmitted force outside of footwear.

CITY GRIP

SOLES
BY /  Stylmartin®

The perfect combination of comfort and safety, ideal for urban use.

A special high-grip, rubber compound is used, it reduces the risk of slipping and provides stability. The tread design is engineered with specific grooves to maximize water dispersion and improve traction in wet conditions. Ideal for motorcyclists who want to tackle urban roads safely and in style!

SPORT GRIP

SOLES
BY

Leveraging Michelin's expertise in tire engineering, these soles offer state-of-the-art performance.

The top quality, soft rubber compound with high anti-slip properties ensures and enhances a safe grip. The unique tread pattern, inspired by sports tires, provides superior adherence and control. Michelin's advanced engineering provides a reliable and staple grip sole that meets the needs of sport riders even in the most demanding situations.

SPORT GRIP

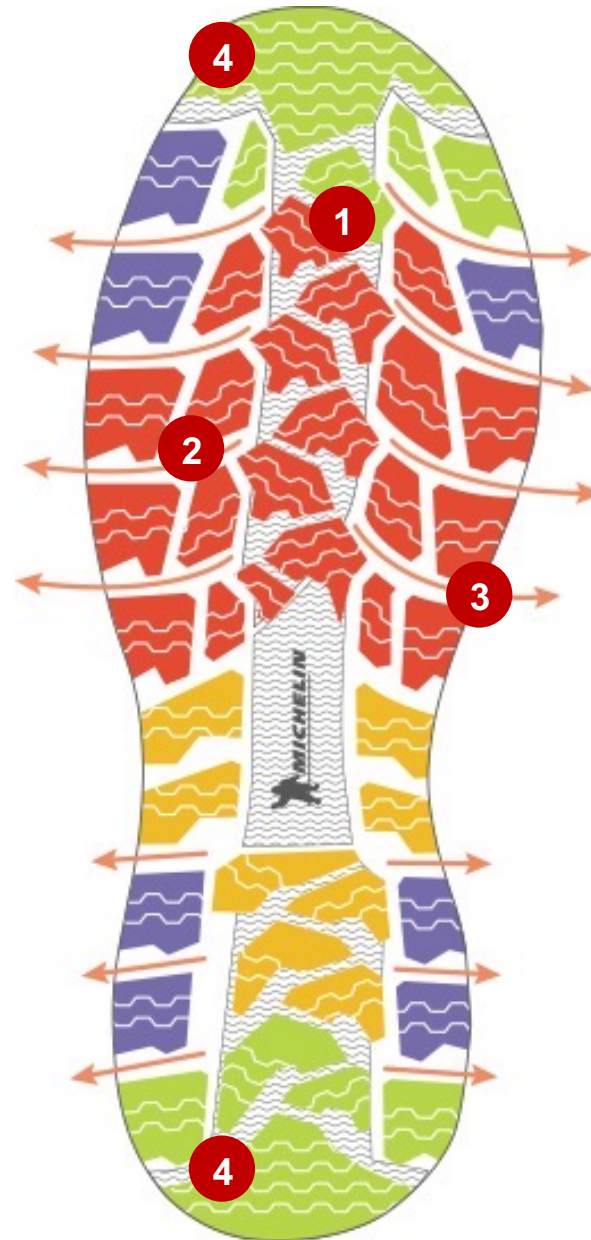

Adherence

Durability

Traction

01.
Interlocked tread design for a constant adherence and contact with the ground.

02.
Sculptures with block siping designed for adherence and traction. Radius at the base of lugs for self cleaning.

03.
Large grooves for flexibility and water evacuation.

04.
Soft antislip rubber with firm grip. Good abrasion resistance. Massive sculptures on heel and toe area for durability.

ADVENTURE GRIP

SOLES
BY /  Stylmartin®

The adventure grip sole furnishes an elevated level of controlled movement and stability. It's particularly designed for those riders who need off-road and all-terrain challenges.

A "Traction" rubber compound with dedicated grip areas in the heel and toe provides durability and reliable grip on uneven surfaces such as sand, gravel, and off-road trails.

The tread design with differentiated anti-slip zones and drainage channels for mud and water, ensure excellent traction even in adverse conditions.
