THAT'S
WHAT WE CALL
RIDING
GEAR!

AROUND THE WORLD

Who is Macna? An innovative private company based in The Netherlands. Macna have been designing and producing motorcycle apparel for over 30 years and are currently distributed throughout 55 countries worldwide. Committed to safety and functionality, Macna have been a driving force in the introduction of stringent compulsory CE Safety Standards for the European market.

100% CE APPROVED
JACKETS AND JEANS. NOT JUST THE ARMOUR!

AT LAST! A new legal regulation for safety standards in Motorcycle Apparel (prEN17092), has come into effect in Europe. All CE Approved Garments have been rigorously tested for seam strength, burst, tear and abrasion resistance and impact absorption. This new standard is not to be confused with ordinary jackets that are just fitted with CE Approved armour. All Macna jackets, jeans and gloves are manufactured to meet or exceed this latest CE Standard.

CHOOSE YOUR **STYLE**

These days, the motorcycle market and its riders' demands are becoming more and more diverse, and you'll find this reflected through our entire product range. So to keep everything nice and convenient, we've divided our products into two different styles.

CORE

Functionality, comfort and innovation come together in the Core collection. Ready for endless miles of riding in all kinds of conditions.

GRAPHITE

Fashionable yet functional: the Graphite line offers a casual look and feel without compromising SAFETY.

GLOVES

From racing gloves to electrically heated winter gloves and everything in between: we're here to lend you a hand in protecting your hands.

ACCESSORIES

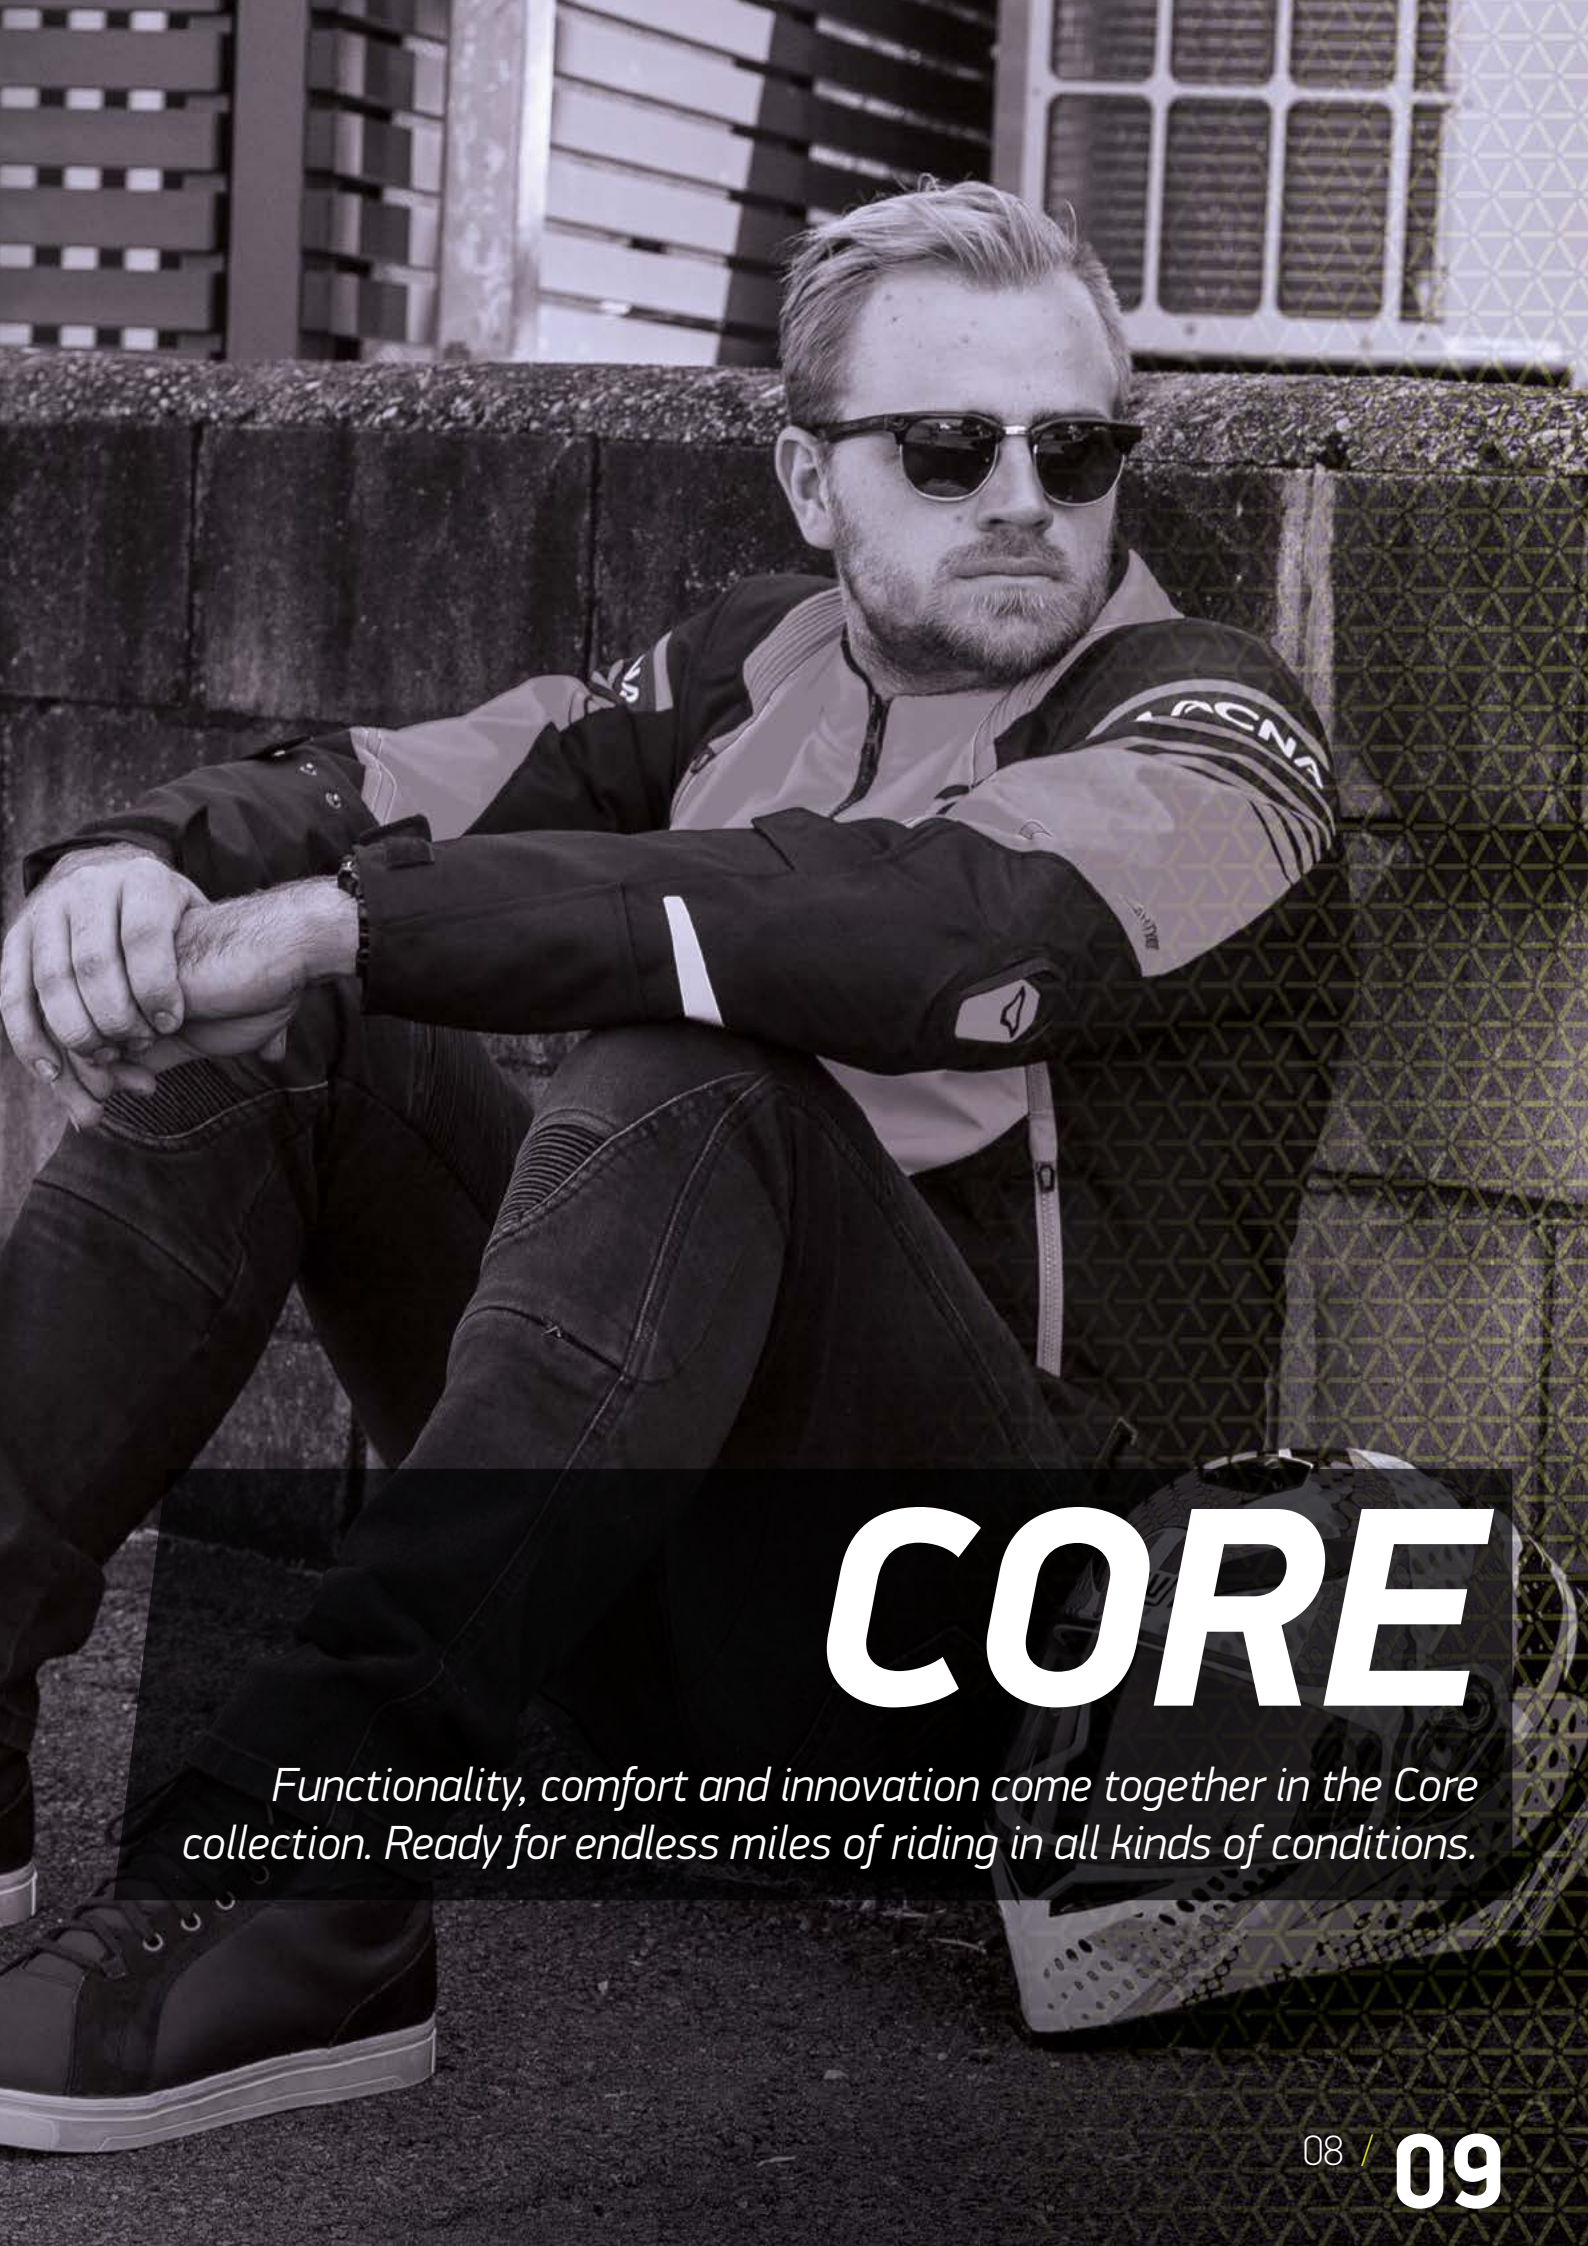

Some extra visibility, a bit more comfort, or need anything to keep your gear in its best shape? There's plenty to do all of that - and more.

CHOOSE YOUR **STYLE**

COOL VEST HYBRID WET

The Macna Hybrid Cooling Vest is light in weight and easy to activate. The vest is suitable for multifunctional usage; such as during work, motorcycling, sports and for recreational purposes. The Hybrid vest is designed to wear in places where there is high ambient temperature and works best at low to medium humidity.

MATERIALS Polyester / Core Polyester / SAF™

LINING Polyester / Polyamide / Elastane.

OTHER SPECS Coolpack prepared.

COOL PACK

The cool packs can be activated by placing them in ice water, fridge or freezer. You can then easily place the cool packs in the special pockets in the vest and cool down immediately. The cooling packs can also be activated by exposing them to an ambient temperature below 19 ° C.

MATERIALS Polyether TPU material.

LINING Biobased Phase Change Material (PCM)

OTHER SPECS Easy charging, Modest temperature.

BATTERIES AND CHARGER INCLUDED
SPARE BATTERIES SOLD SEPARATELY: 64-7883-83

COOL VEST EVO DRY

Your body heat and surrounding temperature will slowly make the water inside the vest vaporize. This causes the surface of your skin to cool down before you get all sweaty. Depending on the temperature and humidity, a 600ml fill will last up to 3 days. Good news for riders with a back pack: the filling cap has evolved into a special waterproof zipper construction at the back.

MATERIALS Polyamide / Polyester / Core Rayon.**LINING** Nylon Jersey.**OTHER SPECS** Ventilation holes, Macna Ziplock closure

HOT VEST

With the Macna Hot Vest you will have a comfortable and warm ride in cold weather conditions. It is the solution without the bulk, easy to mount, easy to use. A fully charged battery will provide up to 3 hours of heat, depending on the heating level.

MATERIALS Polyester.**LINING** 100% Polyester.**OTHER SPECS** Battery included.

ALL SIZES ARE IN CENTIMETRES

All mentioned sizes are an indication. When choosing a product size according to mentioned body sizes you should take the variation from the standard sizing in consideration. If for example you have a waist size M and the hip size L, you will need to choose size L. Only occasionally will one persons different sizes match all measurements within the same standard size. For optimum SAFETY and comfort we recommend to wear the products slim fit. For the best fitting you are advised to visit your local dealer.

THE NEW CE STANDARD EXPLAINED

CE STANDARD EN17092.

- A new legal requirement safety standard for all motorcycle apparel for the EC market (European Community).
- Introduced effective April 2019.

WHAT'S THE BIG DEAL ABOUT INTRODUCING A SAFETY STANDARD?

In most non CE markets there aren't any standards applicable to Motorcycle Apparel. Anyone can get a Chinese factory to produce some Jackets or Jeans, fit some yellow fabric in the impact zones and call it some fictitious name (Super Tenacious Ballistic Nylon enhanced DuPont™ Kevlar®) and take it to the market promising 9.5 seconds of slide time (which may have been legitimately achieved, but on a steep downhill grassy field on a very rainy day). There has never before been any checks or balances to ensure what is being sold is "fit for purpose" nor to check if the product it is made from is actually the material it claims. Until now!

CE APPROVED GARMENT

– WHAT'S DOES IT MEAN?

- Consumers are used to the term CE Approved, but this has been a generic term relevant to any garment that is fitted with CE Armour instead of the old foam rubber padding.
- CE standard EN17092 is this new standard, and this sets the benchmark for seam strength, burst, tear and abrasion resistance, impact absorption and cuff, hem and sleeve sizing and closure restraint as well as chemical testing for pH, Zinc and Chromium levels.
- Not only does the Garment need to meet the above protective qualities, it can only be made in a Certified factory that has been inspected and meets certain standards, all the materials (fabric, zippers, buttons, armour) also must be from certified suppliers. All this information must be documented at time of CE Approval of the particular Garment and no deviation AT ALL is allowed for future production. This guarantees continuity of quality.

- We must be careful to guide our dealers into understanding the difference between the old generic term "CE Approved" relating to the Armour vs this new "CE Approved Garment".

WHAT DOES THIS MEAN TO THE DEALER?

- A Dealer can now be confident they are selling a product that is "fit for purpose".
- Whilst CE Approved is not compulsory in Australia, all "duty of care" obligations are met when selling a correct fitting CE Approved Garment.
- This can eliminate the risk of potential litigation if a rider is hurt and claims damages on the basis they were not sold "fit for purpose" product (you only have to look at the quad sector to see how that has become a potential litigation minefield).

WHAT DOES THIS MEAN TO THE CONSUMER?

A customer can now walk into a dealership and purchase CE Approved Motorcycle Apparel that is guaranteed to have been built to a stringent safety standard.

ARE THERE ANY POTENTIAL DOWNSIDES?

- Europe has one year (from April 2019) to clear their current non CE Approved apparel. From April 2020 non CE Approved apparel can no longer be wholesaled to dealers, and from April 2021 dealers must clear all their non CE stock.
- The above creates the potential for non CE Approved apparel to be dumped into the Australian market as the deadline draws closer for stock to be cleared in the EC.
- Dealers (and consumers) will need to be very conscious of special deals pertaining to substandard non CE product.

THAT'S WHAT WE CALL RIDING GEAR!

www.macnaridinggear.com.au  

COMFIX

Always a perfect fit with Comfix - just click and slide the clip into the right position on the railing. Scratching velcro closures or single position snap closures are a thing from the past.

FULLY VENTILATED

If the temperatures really exceed the normal summer values, a ventilation zipper with small opening just won't cut it. A fully vented jacket or pants will still keep you packed in safely and with all function you normally like, but it feels close to riding in a T-shirt. Large mesh ventilation panels placed at the most sufficient areas will let wind in and out without much resistance.

AIR VENTS

Getting slightly overheated? Then it's time to start opening air vents. Either with a small zip to let air in or unveiling complete mesh panels, cool air can enter simply without much of a hassle.

EASY CUFF

We've got a trick up our sleeve: Easy Cuff. The connection between the detachable membrane and outer shell is placed at the outside instead of the inside. No more annoying loops or snaps, no more messy layers: it's all about easy access. Nice and tidy!

NIGHTEYE

Common grey by day, incredibly luminous at night: when placed in the range of a car's headlights, it'll light up completely!

So how does it work? Basically, it's coated with lots of tiny beads. They act as satellite dishes, reflecting light back to its source, even from long distances.

SIDE EYE

It's Nighteye's little brother. Implemented on the flanks on many of our products, boosting your visibility on the sides while still looking discreet by day.

VISION VEST

Two integrated buckles at the front and a small zipper on the back. That's all you need to secure a Vision Vest. It can remain attached to the jacket at all times and won't interfere with the jackets' functionality.

RAINTEX DL

LIGHT AND DRY

Raintex DL will keep water out. Not only away from your shirt but completely outside the jacket. The breathable waterproof layer is laminated directly to the outer shell, leaving no space in between these layers to store water. Because only the outer shell gets wet, the jacket will dry fast and breathability remains intact.
